So, What's New!

- Spectral aerosol optical depth processing and cloud screening
- Site aerosol climatologies
- Refined and expanded cloudiness ID, including O.D. and nighttime sky cover
- Cloud and aerosol effects investigations
- Instrument & operational improvements
- But:

Current Needs and Activities in Surface Radiometry

- More complete climatic/geographic coverage
- Better understanding of site representativeness
- Improved operational observations, e.g., tracking, cleaning, QC
- Diffuse solar irradiance reference standard
- Thermal irradiance reference standard
- Strengthened recognition as a long-term requirement (GCOS)
- Trends investigation
